Examination and Treatment Report*

Conservator:

Imaging/Samples:

Analysis Performed:

Description:

Condition:

Treatment:

Storage/Exhibition/Handling Requirements:

** This very simple report form is used for general bronze examinations at the Freer and Sackler and can be expanded depending on the need. Analytical work may also be included, although in-depth analysis is usually appended in a separate report. If a large group of objects is to be studied then a separate form for the specific project will often be developed.*
